Summary

After graduating with a degree in Computer Science, I decided to pursue my passion for programming. I enrolled in several courses to become a web developer. I am currently working as a IT Auditor / Business Inteligence Specialist where I have worked on several Web Development projects using various technologies such as HTML, CSS and JavaScript.
My favorite part of programming is the problem-solving aspect. I love the feeling of finally figuring out a solution to a problem. My core stack is React, Next.js, Node.js, and MongoDB. I am also familiar with TypeScript and Prisma. I am always looking to learn new technologies. I am currently looking for a full-time position as a software developer.

When I'm not coding, I enjoy playing reading, working out or playing volleyball.

Experience

BDO Information Technology Auditor

BDO Romania

Sep 2022 - Present (1 year 3 months)

As an IT Auditor, my primary responsibility is to assess and evaluate the IT infrastructure and security systems of our clients' organizations. I work diligently to ensure that their internal applications and overall IT environment adhere to the standards and best practices in the realm of IT security. Through a combination of comprehensive audits, risk assessments, and compliance checks, I aim to identify vulnerabilities, weaknesses, and areas for improvement. By providing detailed insights and recommendations, I help our clients fortify their IT defenses, mitigate risks, and maintain the integrity and confidentiality of their data, thereby contributing to the overall security and efficiency of their operations. My role is pivotal in safeguarding critical information assets and promoting a culture of secure and robust IT practices.

BDO Business Intelligence Specialist

BDO Romania

Sep 2022 - Sep 2023 (1 year 1 month)

As a BI Specialist, I had the opportunity to engage in a diverse range of projects that showcased my proficiency in both web development and data analysis. One of the highlights of my role was the creation of a promotional website for business intelligence products. This website, developed using React and Vue, was hosted on Azure using a suite of Azure services such as Azure Functions, Azure Web App, and Azure Storage. I played a pivotal role in designing and developing the web application, ensuring a seamless user experience.

In addition to my web development work, I also leveraged my skills in Python to complete data analysis projects. These projects involved making API requests to various data sources, collecting and cleaning the data, and subsequently storing it in a SQL database for analysis. This demonstrated my ability

to work with data, manipulate it to extract valuable insights, and maintain data integrity in a relational database. My experience as a BI Specialist not only honed my technical skills but also underscored my capacity to deliver effective solutions in a dynamic and data-driven environment.

Customer Service Sales Assistant

Caffè Concerto

Sep 2019 - May 2020 (9 months)

During my work as a Customer Service Sales Assistant, I consistently demonstrated a strong commitment to customer satisfaction and operational excellence. My primary focus was on ensuring that customers received not only the products they desired but also a superior overall experience. I achieved this by actively engaging with customers, understanding their needs, and providing solutions that exceeded their expectations. Additionally, I took great pride in efficiently managing product orders, ensuring that they were processed accurately and delivered on time. In doing so, I played a crucial role in minimizing customer frustrations and enhancing their trust in our organization. Beyond customer interactions, I also held myself to high organizational standards, ensuring that all aspects of my role, from inventory management to record-keeping, were meticulously executed. This dedication to quality and customer-centricity contributed to a positive and productive environment, ultimately benefiting both our customers and the organization.

Education

Middlesex University

Bachelor's degree, Computer Science

2018 - 2021
